

ENERGYWISE
DOUBLE GLAZED WINDOWS & DOORS

Insulated uPVC Framed Windows & Doors

The new range of sustainable glazing by ...

CertainTeed 

EnergyWise uPVC framed, Double Glazed Windows & Doors

- Affordable for every home
- Custom Sizes
- High thermal resistance
- Acoustic control
- Low maintenance
- Never need painting

uPVC framed windows have long been the premium choice for upmarket residences.

But with new affordable prices, lower energy bills and lower building costs, new EnergyWise windows are amongst the most economical building products.

Benefit from our vast economies of scale

EnergyWise windows and doors are built in volume for world markets. This gives you enormous buying power.

Interior & Exterior Doors

With their silky, low sheen surface finish, EnergyWise doors are equally suited to coastal or inland applications. Ideal for noise control in both residential and commercial applications.

Tested to Australian Standards 2047 & 1288

Be confident of superior insulation values and tight weather seals with all EnergyWise double-glazed windows. They easily meet Australian standards.

Backed by CertainTeed

EnergyWise windows are fully supported by CertainTeed's Melbourne manufacturing facility. CertainTeed have been leaders and pioneers in energy efficient glazing and building design since 1985.

Why uPVC frames are the international standard for double glazed windows

Double glazing is standard in Europe, the USA and much of Asia, especially northern China. And about 65% of the world's residential double glazed windows are framed with uPVC, the proven performer for over 50 years.

uPVC is simply the best window framing material, combining structural integrity, insulation value, low maintenance, good looks and good value.

Profiles are reinforced with steel inserts.

HOUSING SUSTAINABILITY MADE EASY

EnergyWise windows will help your project easily meet government energy rating requirements.

Talk to our project managers about the simplest ways to achieve energy rating compliance.

EnergyWise double glazed windows and doors can often reduce the total cost of building while increasing energy efficiency. Ask us how.

Commercial Projects - the logical investment

You will find uPVC framed double glazed windows hard at work in:

- Apartments
- Home units
- Hospitals
- Hotels, Motels
- Offices
- Schools
- Ski lodges
- Studios
- Townhouses
- Workshops

By slashing energy costs, EnergyWise windows can pay for themselves immediately.

When installed effectively, EnergyWise windows will reduce your capital outlay thanks to savings on air-conditioning, heating systems and drapery.

And by saving energy for a lifetime, EnergyWise windows will always reduce overheads.

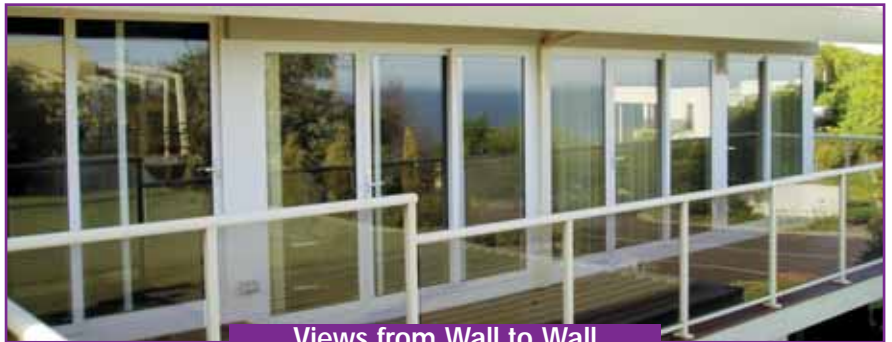

With the cost of energy continually rising, these are very marketable benefits for the astute developers, as well as homeowners.

University Smart House is EnergyWise

Victoria University's 'Smart House' combines traditional charm with the latest in energy and water conservation. Energywise double-glazed windows were specified for maximum insulation, minimal energy consumption and reduced greenhouse gas emissions. Acoustic control is a bonus.

Carefully oriented verandahs control winter sun and summer shade. A model of sustainability, the house also features water catchment, grey water recycling and solar hot water.

The Smart House demonstrates the affordability of energy-efficient housing using economical EnergyWise windows.

Now with internal venetian blinds

Instant privacy and light control - by remote control!

Forget about fiddly winders and cords. You adjust these motorised blinds as easily as changing TV channels.

New EnergyWise internal venetians stay safe and clean between the two panes of airtight, dustproof glass.

Available Styles - Custom Sizes

Your EnergyWise windows and doors will be custom made exclusively for you.

Some popular options are shown here.

Colours & Finishes

Ask about our growing choice of colours and textures, including polymer coatings and vinyl woodgrains.

Internal frames are normally standard white. Coloured internal frames may be ordered at extra cost.

Caution: Printed colours are only approximate and cannot possibly match the depth and vibrancy of real uPVC and vinyl colours.

Ask for colour samples when making your plans. Or visit our showroom.

Woodgrains

Architectural Polymers

Locking

Multi-point locking and latching ensure superior security on most EnergyWise windows and sliding doors.

Single-hung windows feature single-point camlocks.

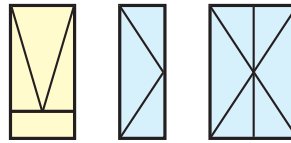

Special Projects

For volume projects or special designs, ask about custom colours and variations on EnergyWise standard styles.
